

R BLOCK, ASAF ALI PARK — PLANT HEALTH

Category export · AI Drone Survey · DDA / DTU parameter framework

Site: R Block, Asaf Ali Park, Asaf Ali Road (DDA)

Survey date: 18 May 2026, 12:16-12:35 IST (single-date baseline)

Category: Plant Health

CATEGORY SCORE				
Indicator	Mean	Min	Max	Rating
Green Cover	76.4%	33%	96.2%	Good

SCENE COVERAGE (park-wide mean)			
Metric	Mean	Min	Max
Green cover	50.6%	0%	84.5%
Bare ground	13.5%	1.4%	51.1%

DETECTOR FINDINGS				
Detector class	Records	Mean cond. %	Worst %	Condition
Stressed Vegetation	20	63.8	63.6	Fair

ANOMALIES (worst first)					
Priority	Zone	Anomaly	Severity	Cond. %	Suggested action
51	Pavilion (close-range)	Stressed Vegetation	Low	63.7	Inspect on ground for water stress; check watering and mulch the root zone.
52	Pavilion (close-range)	Stressed Vegetation	Low	63.8	Inspect on ground for water stress; check watering and mulch the root zone.

RECOMMENDED ACTIONS				
#	Priority	Finding	Recommended action	Owner
3	Medium	Ground around the pavilion is bare and hard-packed (27.7% of frame) with dry plant growth, in contrast to the healthy garden zone.	Reinstate ground cover in the pavilion surrounds; relieve compaction from foot traffic and provide a defined paved apron where desire lines have formed.	Horticulture Division
5	Low	The garden zone is in good condition - 75% green cover, healthy flowering tree cover and shrubs, watering score 93.5.	Maintain the current planting regime in this zone.	Horticulture Division
6	Process	The site record describes widespread dry patches and poor lawn across this park, but Clip 1 shows healthy planting and only 4.6% bare ground. The two clips do not cover the open lawn areas where those defects were observed.	Fly the open lawn and pathway areas of R Block to capture the dry-patch evidence; the current pair of clips under-represents the park's condition.	Survey / Drone Cell

Generated from Asaf_Ali_AI_Detection_Report.xlsx · DDA AI Park Monitor. Figures are the park-wide mean across 2 analysed clips, recomputed directly from the detection log rather than the workbook's own summary formulas.
