RECOMMENDED ACTIONS

#	Priority	Finding	Recommended action	Owner
1	High	The open gym zone has 43% bare ground and 6.3% lawn with an watering score of 39.1, while the rest of the park sits above 90. The failure is localised to the area around the equipment pad.	Extend the watering that works elsewhere in the park into the gym zone, then decompact and re-turf. Consider a defined hard or soft-surface apron around the equipment where foot traffic concentrates.	Horticulture / Engineering
5	Low	The fountain is operating and maintained, hedge beds are clipped and healthy, the central lawn is the strongest in the whole programme, and the built framework is intact.	Maintain the current regime. This park is a useful benchmark for what the other five should look like.	Park Management
